# DSHS Data Technology Improvement Projects

TEXAS  
Health and Human  
Services

Texas Department of State  
Health Services

- Major Initiatives
  - National Electronic Disease Surveillance System (NEDSS) Improvements
  - Texas Immunization Information System – IMMTRAC2
  - Vaccine Allocation and Ordering System (VAOS)
  - State Health Analytics & Reporting Platform (SHARP)

# NEDSS Improvements

- Upgraded NEDSS to latest version.
- Expedited processing and ingestion of electronic lab reports.
- Enhancing key areas of the NEDSS system, including performance, integration, and application enhancement.
- Implemented the infrastructure to import vaccination data for COVID patients in NEDSS.
  - Vaccine breakthrough indicator being displayed on the COVID case investigation page.
- Implemented monkeypox case HL7 reporting and investigation with lab and case line list reports.

TEXAS

Health and Human Services

Texas Department of State  
Health Services

# Close Case Investigation Imports

- Work with jurisdictions that do not currently use the Texas National Electronic Disease Surveillance (NEDSS) Base System (NBS) for capturing their closed case reports.
  - City of Houston, Fort Bend County, Dallas County & Tarrant County
- Export completed investigation reports in the Jurisdiction's system and import those into NEDSS.

# DSHS Electronic Case Reporting (eCR) Pilot Update

TEXAS

Health and Human Services

Texas Department of State  
Health Services

- Phase 1
  - Add COVID-19 electronic initial case reports (eICRs) (nearly completed)
  - Automated the processing in of COVID eICRs to be added to matched case investigation
  - Provides additional tool for investigators to glean further data
  - Onboarding for two pilot facilities will be completed and pushed to production by October.
  - Training for NEDSS users on eICR
- Phase 2 being planned to add additional conditions including monkeypox.
- Expected go-live date is October 10, 2022

# NEDSS Paper Labs Project

## Integrating Health Facility COVID Data

TEXAS

Health and Human Services

Texas Department of State  
Health Services

- Initiated in August 2021 to help onboard Healthcare Facilities and allow them to submit electronic COVID-19 lab reports into NEDSS via HL7 or .csv files.
  - The number of facilities has grown from 232 to now 508 in August 2022 with more facilities being added weekly.
- The project currently offers 3 onboarding options to Healthcare facilities.
  - Greater Good Group LLC (GGG) - If the Facilities are challenged with continuous technology issues, they are referred to the recently added option.
  - USDS/SimpleReport - If the Facilities prefer a low-tech approach and have low volume of data, they are referred to the other recently added option United States Digital Service's
  - Direct to DSHS – If the Facilities submit medium to high volumes of lab reports and have familiarity with secure file transfer sFTP operations.

# **ImmTrac2**

---

# ImmTrac2 Improvements

- Updated data exchange to latest HL7 2.5.1 Compliance standards
- Updated Client Benchmark Report for 18-, 21-, 24-, 36- and 72-month intervals
- Updated data processes to reduce the number of duplicate records in the registry
- Updated National Drug Codes in the registry to match new NDC-10 codes for COVID and non-COVID vaccines
- Began development on ImmTrac2 Modernization project to enhance functionality and user experience

# **Vaccine Allocation & Ordering System (VAOS)**

---

# VAOS Improvements

- Established a scalable, vaccine allocation and ordering system for both COVID and traditional Vaccines for Children and Adult Safety Net vaccines.
- Easy additions of new vaccines for response (i.e., JYNNEOS)
- Addresses CDC requirements for accountability and provider usage of vaccine doses.
- Implemented improved deployment tools to ensure maximum efficiency of system upgrades and enhancements.

# State Health Analytics & Reporting Platform (SHARP)

---

# State Health Analytics & Reporting Platform (SHARP)

TEXAS

Health and Human Services

Texas Department of State  
Health Services

- Collection of:
  - a data warehouse
  - data analytics and visualization tools
  - data governance tools
- Working together to:
  - integrate, store, and enable the analysis of public health data
  - produce reliable reports and analysis
- Does not replace the systems of record

# Data in SHARP

---

1. Existing DSHS data sources
2. Copy of the data needed for reporting and analysis ingested into the platform
3. Only authorized people access data relevant to their role and/or jurisdiction
4. Data are locked down and secured – access granted by data set

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Curated Data Sets

## Need: Consolidated reports

- Data needed for reports are located in multiple source systems and constantly changing

## SHARP: Automated transformation and data quality

- Brings data sets together in one location
- Deduplicates records
- Applies data quality rules

## Impact: Curated data sets

- Curated data sets used for analytics and reporting
- Simplified creation of reports
- Reduced the burden of manually creating reports
- Improved timeliness of reports
- Improved consistency and less error-prone

Trusted data and governance

Reduced manual data processing

Actionable insights

Increased responsiveness

# Enhanced Data Sharing

**Need:**  
**Share data with partners**

- Staff time spent pulling reports
- Inability to provide timely data
- Stress on data source systems

**SHARP:**  
**Direct access to data**

- Aggregate – Tableau dashboards
- Line-level – pull a report from SHARP through source system
- Line-level – Snowflake reader accounts

**Impact:**  
**Increased access to data**

- Partners able to access data they have never had before
- Robust access controls based on roles
- Insights gained through dashboards
- Reduced burden on source systems
- Eliminated extraction and transformation processes

Scalable solution

Reduced manual data processing

Enhanced data sharing

Actionable insights

Increased responsiveness

# Next Steps

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

- Continue to build SHARP
  - Enable/enhance self-service analytics
  - Add additional data sets
- Expanded data governance
- Enhanced data sharing
  - Dashboard for public and public health partners
  - Standardized data sharing procedures and governance
- Enhanced training and communications

# Other DSHS Data System Improvements

---

1. Tx Health Safety Network
2. EMS/Trauma
3. TB/HIV/STD surveillance
4. Inventory system for DSHS pharmacy
5. DSHS Website management system
