

# Black Women and HIV in Bexar County

## The Big Picture

Since 2012, the number of new HIV diagnoses among Black women living in Bexar County has remained steady. Still, as of 2021, Black women in Bexar County have the highest rate of new HIV diagnoses compared to women of other races and ethnicities. In 2021, there were 300 Black women living with HIV in Bexar County. Although Black women make up only seven percent of the Bexar County female population, they are 28 percent of women living with HIV. This shows the continued need to promote HIV prevention and education in Black women.

## Black Women Living With HIV in Bexar County

The rate of Black women living with HIV in Bexar County (398 per 100,000 population) is 4.5 times the rate of Hispanic women living with HIV and 8.9 times the rate of White women living with HIV.

For Black women living in Bexar County who are newly diagnosed with HIV, the most common infection route is through heterosexual sex with a man living with HIV (83 percent).

An early diagnosis of HIV infection helps people get the care they need to stay healthy. Being diagnosed with HIV late (within a year of an AIDS diagnosis) reduces treatment effectiveness. In 2021, 18 percent of Black women diagnosed with HIV in Bexar County received a late diagnosis.

**One in every 211** Black women in Bexar County is living with HIV.

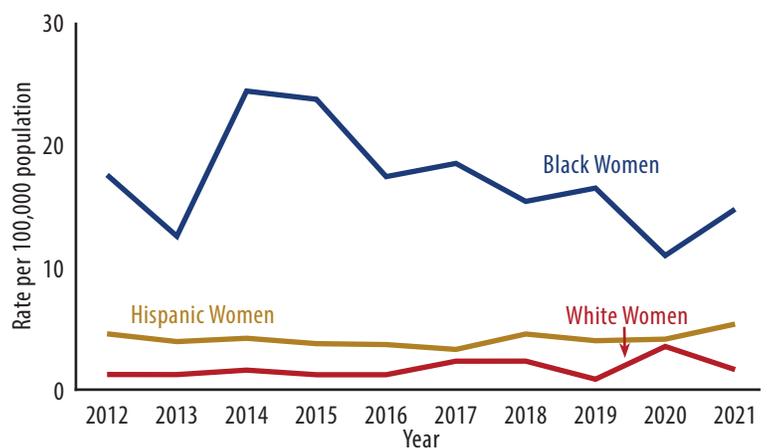

## Black Women Without HIV-Related Medical Care in 2021

More than ever before, advances in medical care have enabled people with HIV to stay healthy and live longer. Some persons living with HIV (PLWH) may not seek care because they do not feel ill. Others may have problems affording or accessing health care. Still others may not seek medical care because of substance abuse, mental health issues, or HIV-related stigma.

More Black persons living with HIV (PLWH) (12,105) did not receive HIV medical care in 2021 compared to other racial and ethnic groups in Texas.

- **Nearly one in three** Black women living with HIV in Texas (3,572) were out of care in 2021.
- **More than one in four** Black women living with HIV in Bexar County (87) were out of care in 2021.
