

Genetics Conference 2014

Newborn Screening: Tales from the Crib

Attend for FREE in Either San Antonio, Dallas or Austin

Continuing education credit for multiple disciplines will be provided.

Every year approximately 400,000 babies are born in Texas and receive newborn screening shortly after birth. Join us to learn how the Texas Newborn Screening system functions today and what the future might hold. New technologies have allowed for expansion of conditions detected by newborn screening. As genetic technologies continue to progress the newborn screening system will continue to evolve and bring with it new challenges to science, to clinical care, and new ethical issues. Please join our distinguished speakers to explore the world of newborn screening and genetics.

Who Should Attend:

Physicians, nurses, nurse practitioners, PAs, CNMs, genetic counselors and others who may encounter patients with genetic disorders. Fields include, but are not limited to, general and family practice, pediatrics, OB/Gyn, and Genetics.

How to Register:

For additional information or to register, visit <http://geneticsconferencetx.com> or call 877.451.8700.

Schedule at a Glance

8:30-9:45 am

Registration

9:45-10 am

Welcome Remarks

10-11 am

50 Years of Newborn Screening:
How Did We Get Here?

11-11:15 am

Break with Exhibitors

11:15 am-12:15 pm

Texas Newborn Screening:
Where Are We Now?

12:15-1:15 pm

Networking Lunch:
The Importance of Early Detection

1:15-2:15 pm

Into the Future: Newborn Screening,
Genomics and Beyond

2:15-3:15 pm

Emerging Ethical Challenges
in Newborn Screening

3:15-3:30 pm

Break with Exhibitors

3:30-4:30 pm

P3 Perspectives: Physicians,
Parents and Providers

4:30-5 pm

Closing Remarks

5 pm

Networking Reception

Sat. July 26

San Antonio

Hilton Palacio del Rio
