TO: SandCrab Lite Reporting Facilities

FROM: Texas Cancer Registry (TCR)  
Cancer Epidemiology and Surveillance

SUBJECT: SandCrab Lite (SCL) Version 10 Software and User's Guide ([2010 Updates](#))

DATE: September 30, 2010

This mailing is in follow up to correspondence sent on 9/23/2010 regarding the release of SCL version 10.1.188. If you have not already downloaded the new version of SCL, and you currently use SCL 10, this update will automatically download and install on your system if you have the automatic updates feature turned ON. This update will take 2 - 10 minutes to download and update your system. **High speed internet connectivity is required** for automatic updates for new installs. If "check for updates" is turned off, go to "Maintenance/Setup" tab, "User Preferences", and click on "Turn Auto-Update Feature ON". If your facility does not allow automatic updates, please contact the SCL Help Desk number referenced below. NOTE: some changes have been made to the software after the 9/23/2010 correspondence and we are now on version 10.1.191.

If your facility currently uses SCL 10, the updated User's Guide can be downloaded from our website (Step 1 only) <http://www.dshs.state.tx.us/tcr/sclite.shtm>. The cover of the User's Guide remained the same, but for this update, the cover displays "Revised September 2010" in a red box to assist you in assuring you have the current document. A hardcopy of the User's Guide will be provided only upon request. This version of the software can run on computers with Windows 7, 98, 2000, ME, NT, XP, VISTA, and is network capable.

This update includes the latest NAACCR version 12 edits necessary to meet cancer reporting requirements for 2010 cases and SCL has been updated to require data submissions utilizing our WS-FTP (file sharing) Web Transfer Module. **SCL version 10 is required to be used for reporting cases for all years.** *Records submitted using versions prior to 10.1.191 will no longer be accepted.*

Please contact the SCL Help Desk at the central office at 800.252.8059 or 512.458.7523 for any needed clarifications on the installation of this software and/or the revised User's Guide. If your facility is participating in our Casefinding Data Collection Project, you will not need to install this new version for reporting purposes, but can if you wish. As always, we welcome any comments that you have on this new version of SCL and suggestions for improvements. Comments may be submitted to the TCR by completing Appendix A located in the User's Guide and can be mailed or faxed as indicated on the form.
