

Dedicated webpages are a keyway that Administrative Agencies can communicate their expectations with multiple stakeholders. Clear communication is one of the key components of Policy Clarification Notice 15-02 and appears in many in domains of the Organizational Assessment.

AAs are encouraged to have dedicated CQM webpages and to regularly share information with each other about their relative success in engaging relevant stakeholders using the webpage. AAs are also encouraged to reach outside of Texas and across RWHAP Parts funding to identify promising practices, novel formats, etc.

Below is a partial listing of websites for RWHAP funded CQM programs showing a range of formats.

**Texas Part B**
