

Black Women and HIV in Tarrant County

The Big Picture

Since 2012, the number of new HIV diagnoses among Black women living in Tarrant County has decreased by nine percent. Still, as of 2021, Black women in Tarrant County have the highest rate of new HIV diagnoses compared to women of other races and ethnicities. In 2021, there were 919 Black women living with HIV in Tarrant County. Although Black women make up only 16 percent of the Tarrant County female population, they are 60 percent of women living with HIV. This shows the continued need to promote HIV prevention and education in Black women.

Black Women Living With HIV in Tarrant County

The rate of Black women living with HIV in Tarrant County (464 per 100,000 population) is 5.8 times the rate of Hispanic women living with HIV and 8.8 times the rate of White women living with HIV.

The most common way Black women in Tarrant County get HIV is through sex with a male living with HIV (88 percent).

An early diagnosis of HIV infection helps people get the care they need to stay healthy. Being diagnosed with HIV late (within a year of an AIDS diagnosis) reduces treatment effectiveness. In 2021, 29 percent of Black women diagnosed with HIV in Tarrant County received a late diagnosis.

One in every 162 Black women in Tarrant County is living with HIV.

Rate of New HIV Diagnoses in Women by Race/Ethnicity, Tarrant County, 2012-2021

Most years have few or no HIV diagnoses in women from other races or of mixed race in Tarrant County. You can find rates for all races in the Black Women and HIV in Texas fact sheet.

Black Women Without HIV-Related Medical Care in 2021

More than ever before, advances in medical care have enabled people with HIV to stay healthy and live longer. Some persons living with HIV may not seek care because they do not feel ill. Others may have problems affording or accessing health care. Still others may not seek medical care because of substance abuse, mental health issues, or HIV-related stigma.

More Black persons living with HIV (PLWH) (12,105) did not receive HIV medical care in 2021 compared to other racial and ethnic groups in Texas.

- **Nearly one in three** Black women living with HIV in **Texas** (3,572) were out of care in 2021.
- **More than one in four** Black women living with HIV in **Tarrant County** (263) were out of care in 2021.
