ZIKA VIRUS DISEASE ⁵	0	0	0	0	0	0	0	-	-	0	0	0	-

Note: Per Emerging and Acute Infectious Disease Unit Data Suppression policy, beginning with data published after September 2021, subgroup case counts of 1-4 and fatalities counts of 1-9 are not provided (-). Additional counts (-) are suppressed to prevent back-calculation of suppressed small counts.

¹ Event month for each condition and/or case may be month of onset, or month of diagnosis, report, or other event that approximates onset. Prion Disease is not included.

² Diseases listed reflect those that were notifiable in Texas each year based on Texas Administrative Code. Counts are by calendar year. Case counts are presumed to be underestimates of true disease incidence due to incomplete reporting. Data in this table may not match tables in articles in this publication that were written prior to completion of data review for this report, or other previously published materials.

³ Prion Disease is not included in this table.

⁴ Infant botulism cases are under 1 year of age by definition.

⁵ These arbovirus counts include both neuroinvasive and non-neuroinvasive cases.

⁶ For Influenza-associated pediatric mortality the event month is the month of death. Influenza-associated pediatric mortality cases are under 18 years of age by definition.

⁷ Includes all cases of invasive *Neisseria meningitidis* including cases of meningitis, septicemia, and joint infections.

⁸ Vancomycin-intermediate resistant *Staphylococcus aureus* (VISA)–*Staphylococcus aureus* with a vancomycin minimum inhibitory concentration (MIC) of 4 µg/mL through 8 µg/mL.
