

# Viewing Multiple Events for One Person

As a reminder, an **event** is the occurrence of a disease and a person. A person can be associated with more than one event if he or she has multiple diseases. For example, if a man has TB, HIV, and syphilis, he would have three events. If he were re-infected with syphilis two years later, he would have four events. A person can only have HIV once, so there should never be more than one HIV event for a single individual.

For individuals who have multiple diseases or re-infections of the same disease, users may want to view details for his/her different events. The following steps explain how to do this:

Once you are in an event for an individual, you will see the Event Summary screen as shown below.

The screenshot shows the 'Event Summary' screen in the Maven Disease Surveillance Suite. The 'Basic Information' section is highlighted with a red box. A red arrow points to the person's name 'Josh Smith' in the 'Person' field. Below the 'Basic Information' section, there is a 'Question Packages' table with columns for 'Question Package', 'Last Update', 'Updated By', and 'Status'.

Question Package	Last Update	Updated By	Status
Demographic	02/21/2018	Betty Cohen [jcohen]	Completed
Reporting / Mortality	09/13/2017	Melissa Roach [mroach]	Incomplete
Case Assignment / Field Record	09/13/2017	Melissa Roach [mroach]	Incomplete
Follow-up Activity	09/13/2017	Melissa Roach [mroach]	Incomplete
Risk Factors	09/13/2017	Melissa Roach [mroach]	Incomplete
Partners / Clusters	09/13/2017	Melissa Roach [mroach]	Incomplete
Clinical	09/13/2017	Melissa Roach [mroach]	Incomplete
Visions	09/13/2017	Melissa Roach [mroach]	Incomplete
Data to Care	09/13/2017	Melissa Roach [mroach]	Completed
Create new Providers or Facility	09/13/2017	Melissa Roach [mroach]	Completed
Pregnancy Tracking	09/13/2017	Melissa Roach [mroach]	Completed
Collection Management	09/13/2017	Melissa Roach [mroach]	Completed

In the Basic Information section, **select the person's name** (it will be a blue link).

Selecting the name will bring you to the Person Summary screen as seen below.

The screenshot displays the 'Person Summary' interface. It is divided into several sections: 'Demographic Information (View History)', 'Contact Information', 'Event Information', and 'Labs'. The 'Event Information' section is highlighted with a red box, and a red arrow points to the 'Event ID' column of the table within this section.

Demographic Information (View History)						
Name:	Smith, Josh					
Birth Date:	03/27/1990					
Death Date:						
Living Status:	Alive					
Age:	27					
Social Security Number:	PBEWSDA2DH					
Party ID:	09132017					
Create Date:	09/13/2017					

Contact Information						
Type	Address	County	Country	Phone	GIS Info	Action
Home * Primary	TX		USA		Incomplete Data	<a href="#">Edit</a> <a href="#">Delete</a>

Event Information					
Events					
Event ID	Person	Status	Create Date	Disease	
<a href="#">200001690</a>	Smith, Josh	Open	02/21/2018	700 - Syphilis	
<a href="#">200001688</a>	Smith, Josh	Open	02/21/2018	200 - Chlamydia	
<a href="#">100000772</a>	Smith, Josh	Open	09/13/2017	900 - HIV	

Labs							
Lab No.	Collection Date	Test	Result	Modifier	Result Value	Ordering Facility	Created
1	09/04/2017	HIV-1/2 Ag/Ab Differentiat...	Antigen Reactive				09/13/2017

Under Event Information, all events for that person are listed. The Disease column lists the name of the disease and the Create Date provides information about when the event was created in THISIS, which should provide a rough time frame for when the event occurred. Based on this information, **select the blue link under the Event ID** to see details and update information (if permissions allow) for the desired event.

Once you enter the event summary for this other event, you can follow the same steps to return to the initial event or view other events for the individual.
