October 23, 2000

The Honorable George W. Bush  
Governor of Texas  
P.O. Box 12428  
Austin, Texas 78711

Dear Governor Bush:

As you know the Texas Natural Resource Conservation Commission published "Texas Compact Low-Level Radioactive Waste Generation Trends and Management Alternative Study" in September of this year. The Texas Radiation Advisory Board (TRAB) reviewed the report at its meeting October 14, 2000, and members believe this comprehensive study provides informative details on the complex issue of radioactive waste management.

The board voted the following recommendation:

TRAB recommends that the report be used as a reference and action be taken to develop Texas statutes and policies to address the radioactive waste management and compact issues.

If you have any question regarding TRAB's recommendation, please let me know.

Sincerely,

original signed by

Dale E. Klein, P.E., Ph.D.
