Table 1 lists information on full-time, part-time, and full-time equivalent (FTE) faculty positions as of September 30, 2017 among 30 of the 31 graduate schools. 57.4% of graduate faculty positions were full-time, decreasing from 60.5% in 2016. The total number of FTE positions filled was 632.

1 Each full-time position counts as 1.0 FTE; each part-time position counts as 0.5 FTE.
2 29 faculty positions were filled by faculty without nursing licenses.
3 1 graduate school was excluded from certain analyses due to unverified data.
Facility Vacancy and Turnover in Graduate Schools

Vacancy

The total faculty vacancy rate for 30 of the 31 graduate schools was 8.4% in 2017, increasing from 5.7% in 2016. Schools reported 46 full-time vacancies and 24 part-time vacancies, representing a 9.1% vacancy rate among full-time faculty and a 6.6% vacancy rate among part-time faculty. 10 schools reported zero faculty vacancies. The graduate faculty vacancy rate (8.4%) was higher than the faculty vacancy rate in prelicensure professional nursing programs (5.4%).

Length of Vacancy and Barriers to Faculty Recruitment

All 31 graduate schools indicated how many weeks, in general, faculty positions remain vacant. On average, faculty positions remained vacant for about 33 weeks. The number of weeks to fill vacant positions ranged from 0 weeks (1 school) to 104 weeks (2 schools). 10 schools reported that it took 52 weeks or longer for vacant faculty positions to be filled. The median number of weeks reported was 24 weeks, greater than the 12 weeks reported for faculty positions in professional nursing programs. Graduate schools selected barriers to faculty recruitment they faced during AY 2016-2017. A limited qualified applicant pool was most often selected as a barrier to faculty recruitment (24 schools). Non-competitive salary was also cited by the majority of programs (19 schools). Geographic location was a barrier for 15 schools. 4 schools did not indicate any barriers to faculty recruitment.

Length of Faculty Contracts

The 31 graduate schools reported the length of the program’s standard faculty teaching contract during an academic year. 16 schools reported a 9-month contract length. 10 schools reported a 12-month contract length. 1 school reported a 10-month contract length. 2 school reported an 11-month contract length. 2 schools listed other contract lengths with 1 school listing different options depending on the nursing program.

Turnover\(\text{(n=30)}\)

The faculty turnover rate across graduate schools was 9.6% in AY 2016-2017, compared to 11.3% in professional nursing programs and 22.1% in vocational nursing programs. The median turnover rate was 11.6%. 5 schools reported no turnover during AY 2016-2017.

Faculty Demographics in Graduate Schools

Demographic data were incomplete as some faculty may have left the corresponding field blank on their licensure renewal form, or they did not have a Texas RN license, such as in the case of faculty practicing with a compact license. The Nurse Licensure Compact is an agreement between states to recognize each others’ licenses.

30 of the 31 graduate nursing schools surveyed filled out the 2017 NEPIS Faculty Profile, providing data for faculty who were employed as of September 30, 2017. Demographics including sex, age, and race/ethnicity were obtained from the 2017 Texas BON Licensure Renewal databases. Data completeness varied for each demographic measure (sex, n=718; age, n=735 ; race/ethnicity, n=716).
Sex
The majority of graduate faculty were female (91.6%, n=718).

Age
As shown in Figure 1, the majority of faculty were between 45 and 64 years of age.
The median age of faculty as of September 30, 2017 was 55 years, and the mean age was 53.3 years.
33.3% (245) of faculty were 50 to 61 years of age and would be eligible for retirement within the next 12 years.\textsuperscript{11}
28.3% (208) of faculty were age 62 or older and were eligible for retirement.

The median age of faculty as of September 30, 2017 was 55 years, and the mean age was 53.3 years.
33.3% (245) of faculty were 50 to 61 years of age and would be eligible for retirement within the next 12 years.\textsuperscript{11}
28.3% (208) of faculty were age 62 or older and were eligible for retirement.

Figure 1. Faculty age, 2017 (n=735)

Race/Ethnicity
As shown in Figure 2, the race/ethnicity distribution of 2017 graduate faculty (n=716) did not mirror that of the projected Texas population.
The vast majority of faculty were white/Caucasian (73.5%), followed by Hispanic/Latino (11.5%), black/African American (8.9%), and other (6.1%).

Educational Preparation of Faculty in Graduate Schools

Education
Figure 3 displays the highest degrees of 767 graduate faculty with a nursing license that 30 graduate schools reported on the 2017 Graduate NEPIS Faculty Profile.\textsuperscript{14}
Nearly all graduate faculty held at least a master’s degree, and over half (69.2%) held a doctoral degree.
Among faculty with a doctoral degree, the most common was a PhD in nursing (50.3% of faculty with a doctoral degree).

\textsuperscript{14}Highest degree of faculty includes faculty with an out-of-state nursing license, but excludes faculty without a nursing license. Faculty who worked in more than one program were only counted once.
