This update presents information for the 119 pre-licensure registered nursing (RN) programs that reported data for the 2017 reporting year, including:

- 1 diploma program;
- 68 Associate Degree in Nursing (ADN) programs, including 57 generic ADN programs and 11 licensed vocational nurse (LVN) to ADN stand-alone programs;
- 49 Bachelor of Science in Nursing (BSN) programs; and
- 1 Master of Science in Nursing Alternate Entry (MSN AE) program.

The Texas Center for Nursing Workforce Studies (TCNWS) collected data using the 2017 Board of Nursing’s (BON) Nursing Education Program Information Survey (NEPIS) that was available online as of October 2, 2017. The reporting period was academic year (AY) 2016-2017 (September 1, 2016 – August 31, 2017) unless otherwise noted. TCNWS collaborated with the BON in the design and dissemination of the survey.

### Faculty Positions in Professional Nursing Programs

In the 2017 NEPIS, programs were asked to report the number of full- and part-time faculty positions filled, as well as the number of full- and part-time vacancies. Programs were also asked to differentiate between retirements and resignations. In years prior to 2012, retirements and resignations were reported together. As shown in Table 1:

- There were 2,703.5 full-time equivalent (FTE) positions filled as of September 30, 2017, which was more than the 2,587.5 FTE positions reported in 2016.¹
- Between 2016 and 2017, 59 programs increased their total number of FTE positions (filled and vacant), 42 decreased, and 12 stayed the same.
- As of September 30, 2017, there were 154.5 FTE vacancies, 8.3% less than the 168.5 vacancies reported in 2016.
- During AY 2016-2017, there were 243.5 FTE resignations and 57.0 FTE retirements. The number of FTE resignations decreased by 9.0% (24.0 FTE resignations) from AY 2015-2016 to AY 2016-2017.

Figure 1 displays the proportion of faculty positions that were full- and part-time from 2008 to 2017.

- The proportion of part-time faculty positions has increased by 47.9% since 2008.
- From 2016 to 2017, the proportion of full-time faculty positions decreased from 63.3% to 61.7% (a decrease of 2.5%).

¹Each full-time position counts as 1.0 FTE; each part-time position counts as 0.5 FTE.
Faculty Vacancy in Professional Nursing Programs

As shown in Table 2, the 2017 total faculty vacancy rate was 5.4%, a decrease from 6.1% in 2016.2

- In Texas, vacancy rates in individual programs ranged from 0% (42 programs) to 40% (1 program).
- Since 2008, faculty vacancy rates continued to be highest among ADN programs.
- Between 2016 and 2017, 57 programs decreased their vacancy rate, 35 increased, and 21 stayed the same.
- 84.9% of programs had fewer than 3 FTE vacancies. Only 6 programs reported having greater than 5 FTE vacancies.

Length of Vacancy and Barriers to Faculty Recruitment

In the 2017 RN NEPIS, programs were asked how many weeks, in general, faculty positions remain vacant.

- The number of weeks to fill vacant positions ranged from zero (3 programs or 2.5%) to 104 weeks (1 program or 0.8%).
- The median number of weeks reported was 12.

Faculty Turnover in Professional Nursing Programs

During AY 2016-2017, the faculty turnover rate for all programs was 11.3%, representing a 17.5% decrease from AY 2015-2016 (see Table 3).5

- Turnover rates by program type ranged from 8.6% in the diploma program to 13.1% in ADN programs.
- Between 2016 and 2017, 60 programs decreased their turnover rate, 42 increased, and 8 stayed the same.

In addition, 26 programs (21.8%) reported that there was a change in the program’s dean or director during AY 2016-2017.

5Turnover rates were calculated by dividing the total number of resignations and retirements (full- and part-time) during the reporting year by the total number of filled positions as of September 30 of the previous reporting year. New programs that were not operating during the reporting period were not included in the turnover rates for 2017.

6The BSN turnover rate includes the MSN AE program and the ADN turnover rate includes LVN to ADN stand-alone program turnover rates.
As of September 30, 2017, there were 3,344 faculty in professional nursing education programs in Texas. Please note that this number includes both full- and part-time faculty. The demographics below were obtained from the Texas Board of Nursing 2017 Licensure Renewal database except highest degree, which was obtained from the faculty profile reports. Demographic information was available for 94.5% of faculty listed in the faculty profile; the remaining faculty either left the corresponding field blank on their licensure renewal form or their reported license number did not match any in the database. This happens for several reasons, the most common being that they are newly licensed or not licensed in Texas, but may practice with a compact license. The Nurse Licensure Compact is an agreement between states to recognize each others’ licenses.

Sex

The professional nursing faculty population was predominantly female: 91.5% in 2017, which was almost unchanged from 2016 (92.0%).

Age

Figure 2 displays the age breakdown of professional nursing faculty as of 2017.

- Faculty age ranged from 24 to 81 years.
- 65.5% of faculty were 46 years of age or older.
- 34.5% of faculty were under 46 years old.
- The mean and median age of faculty were 51 and 52 years, respectively. This was unchanged from 2016.

- 32.7% of faculty were 50 to 61 years of age and will be eligible for retirement within the next 12 years, which is less than the 43.0% of faculty who were 50 to 61 years of age 5 years ago in 2012.
- 22.6% of faculty were 62 years of age or older and currently eligible for retirement. This is mostly unchanged from 22.8% of faculty in 2016.

Race/Ethnicity

As shown in Figure 3, the race/ethnicity distribution of 2017 RN faculty did not mirror that of the Texas population.

- The majority of RN faculty were white/Caucasian (67.9%). The proportion of white/Caucasian RN graduates in 2017 was lower (49.2%).
- The proportion of RN faculty who were Hispanic/Latino (10.5%) is approximately one-fourth the proportion in the Texas population (41.0%). The proportion of Hispanic RN graduates in 2017 was higher (27.9%).
- The percentages of faculty who were black/African American (13.9%) and other races (7.7%) more closely mirrored the Texas population and the Texas RN workforce.
- The 2017 distribution of race/ethnicity among RN faculty is similar to that of previous years.

Figure 3. Race/Ethnicity of RN Faculty, Texas RN Workforce, and Texas Population, 2017

7The earliest retirement age for social security is 62. (www.socialsecurity.gov).
8RN workforce data come from the 2017 BON Licensure Renewal file of actively practicing Texas nurses.
Educational Preparation of Faculty in Professional Nursing Programs

Figures 4 and 5 display the highest academic credential of faculty in professional nursing programs.

- The majority of RN faculty held master’s degrees (72.0%). Of those, all but 1 held a master’s in nursing degree.
- 714 (22.7%) faculty held doctoral degrees.

**Figure 4. Highest Degree of Faculty, 2017**

- 352 faculty held PhDs in Nursing.
- 235 faculty held a Doctor of Nursing Practice (DNP).
- 118 faculty held doctorates in a discipline other than nursing.
- The remaining 9 faculty with doctorates held either a Doctor of Nursing Science (DNS) or other doctorates in nursing.

**Figure 5. Breakdown of Faculty Doctoral Degrees, 2017**

Programs were asked how many faculty members had a specialty in nursing education.

- 778 full-time faculty members had a specialty in nursing education (37.7% of all full-time faculty).
- 329 part-time faculty members had a specialty in nursing education (25.7% of all part-time faculty).
