

YOUTH CLUBS: Page 2 of 2

- Do not allow employees, volunteers, or contractors with new or worsening signs or symptoms listed above to return to the youth club facility until:
 - In the case of an employee, volunteer, or contractor who was diagnosed with COVID-19, the individual may return to work when all three of the following criteria are met: at least 3 days (72 hours) have passed *since recovery* (resolution of fever without the use of fever-reducing medications); and the individual has *improvement* in symptoms (e.g., cough, shortness of breath); and at least 10 days have passed *since symptoms first appeared*; or
 - In the case of an employee, volunteer, or contractor who has symptoms that could be COVID-19 and does not get evaluated by a medical professional or tested for COVID-19, the individual is assumed to have COVID-19, and the individual may not return to work until the individual has completed the same three-step criteria listed above; or
 - If the employee, volunteer, or contractor has symptoms that could be COVID-19 and wants to return to work before completing the above self-isolation period, the individual must obtain a medical professional's note clearing the individual for return based on an alternative diagnosis.
- Do not allow an employee, volunteer, or contractor with known close contact to a person who is lab-confirmed to have COVID-19 to return to the youth club facility until the end of the 14 day self-quarantine period from the last date of exposure (with an exception granted for healthcare workers and critical infrastructure workers).
- Have employees, volunteers, and contractors wash or sanitize their hands upon entering the youth club facility.
- Have employees, volunteers, and contractors maintain at least 6 feet of separation from other individuals. If such distancing is not feasible, other measures such as face covering, hand hygiene, cough etiquette, cleanliness, and sanitation should be rigorously practiced.
- If a youth club provides a meal for employees, volunteers, contractors, and/or participants, youth clubs are recommended to have the meal individually packed for each individual.

Health protocols for your facilities:

- If 6 feet of separation is not available between employees, volunteers, contractors, and/or participants inside the facility, consider the use of engineering controls, such as dividers between individuals, to minimize the chances of transmission of COVID-19
- Regularly and frequently clean and disinfect any regularly touched surfaces, such as doorknobs, tables, chairs, and restrooms.
- Disinfect any items that come into contact with individuals.
- Make hand sanitizer, disinfecting wipes, soap and water, or similar disinfectant readily available to employees, volunteers, contractors, and participants.
- Consider placing [readily visible signage](#) at the youth club facility to remind everyone of best hygiene practices.
- Consider having an individual wholly or partially dedicated to ensuring the health protocols adopted by the youth club are being successfully implemented and followed.
