

Harsh Conditions Radio Transcript

Winter is upon us. And Texas is where you'll find some of the harshest winter conditions anywhere on the planet . . .

. . . indoors.

That's because Covid spreads more easily *indoors*.

So during the winter months and holidays, we should gather virtually if possible. But if you *are* with family or friends indoors, wear a mask and stay 6 feet apart. Wash your hands often and stay home when you're sick.

Let's work together for a healthy Texas.

From the Texas Department of State Health Services.
