RE: Proposal for Organized Neonatal and Pediatric Disaster relief by specialty  
Trained teams supported by the State of Texas

---

This proposal is to request the review of the Pediatric Disaster Coalition White Paper and Memorandum of Understanding to be utilized in disaster relief for neonatal and pediatric specialty populations. This would include an acknowledged and organized process within state disaster operations current disaster response to include specialty trained transport teams, equipment, and vehicles.

Thank you for your consideration of this proposal, modification to the current disaster process, and support as this proposal is further discussed.
