

2007 Results of Biannual Report of Immunization Status

This survey is conducted biannually to assess vaccination coverage levels of children attending a childcare facility and to monitor compliance with new and existing vaccine requirements at licensed child care centers (LCCC) and registered child care homes (RCCH) in Texas. A random sample of childcare facilities is selected for the survey every other year. Local health departments and DSHS staff review a random sample of immunization records from each selected childcare facility. Statewide and regional vaccination coverage levels are available for children ages 19 – 59 months of age attending childcare facilities in Texas.

2007 Texas Childcare Immunization Assessment Results:

Individual Vaccination Coverage Levels among Childcare Attendees Aged 19 – 59 Months, Texas and HSR, 2007

Area	DTaP‡	Polio§	MMR	Var††	HepB*	Hib¶	PCV§§	HepA**
Texas	90.1	95.3	93.9	92.8	93.1	95.5	73.0	49.8
