October 20, 2022

Dear Texas Vaccines for Children (TVFC) Program Provider,

Starting **Monday, October 24, 2022**, TVFC Program pediatric influenza vaccines will be available to order in the Vaccine Allocation and Ordering System (VAOS). TVFC Program providers must complete the required reporting in VAOS prior to placing an order. Below are the following pediatric influenza presentations that will be available for ordering:

<b>Vaccine Brand</b>	<b>Manufacturer</b>	<b>NDC</b>	<b>Formulation</b>	<b>Age Indication</b>
Flulaval	GSK	19515-0808-52	0.5mL PFS	6 months +
Fluarix	GSK	58160-0890-52	0.5mL PFS	6 months +
Fluzone	Sanofi	49281-0422-50	0.5mL PFS	6 months +
FluMist	AstraZeneca	66019-0309-10	Intranasal Sprayer	2-49 years

Single-dose vial (SDV) and Multi-dose vial (MDV) presentations are also available upon request. As specific brands are depleted, an equivalent vaccine will be substituted if available.

Additionally, all pending pediatric influenza allocations must be acknowledged in VAOS by 12 PM CST on Saturday, October 22<sup>nd</sup>. Any allocations that are not acknowledged by this time will be released and made available for general ordering for all TVFC Program providers.

Thank you for your participation in the TVFC Program. Please contact your Responsible Entity for questions.
