Step A6: Manner of Usage

How does your organization plan to report immunization data to ImmTrac2? Through direct data entry or electronic data exchange? (All organizations should select this option to begin. The other option is for later).

Organizations who plan to manually enter the data online in ImmTrac2 should select “Direct Data Entry”. Once an option is selected, click save and continue.

Important Information: To establish an electronic data exchange interface using unidirectional data exchange (i.e., reporting via S/FTP or batch HL7 files) with the registry, you must access ImmTrac2 directly and submit registration of intent. Do not proceed with your registration via the Texas DSHS Immunization Program Portal in the Syntropi – CRC application.

The screenshot shows a web form titled "ImmTrac2 Manner of Usage". The main question is "How does your organization plan to report its immunization data to the Texas Immunization Registry?". There are two radio button options: "Direct Data Entry- Manually enter data using the ImmTrac2 application." (which is selected) and "Electronic Data Exchange (HL7)- Report data electronically via a web service interface with our EHR. Select this option for bidirectional data exchange. See the Important Information section of this page for information on unidirectional data exchange." Below the options is a "Save & Continue" button.

Appendix B: Common Issues for Completing Site Registrations

Required fields have an asterisk (*) and are in blue. Before submitting a registration, review each section of the application and look for required fields that are blank.

Unique organization name: The organization name must be unique. For large organizations with similar names, use a unique identifier specific to the site. (Ex: “Pediatric Clinic – Dr. Paul Smith” or “Kindercare – 1003” or “Martin Luther King Middle – Austin ISD”)

Unique physical address: If the address already exists in ImmTrac2 by a different business, use address line two to make the address unique, such as adding a suite number. Look out for spaces before, after, or in the Email addresses:

User Account Info: If you are a “current user”, do not add yourself as an additional user. Advanced Practice Nurses (APN) should not put an “AP” in front of their license number.

The email address for each user must be unique. For security purposes, each user account is required to have a unique e-mail address. This will allow each individual user to reset their own password and retrieve their Org Code and Username. See Figure 55: Forgot Username and Forgot Password Buttons, Figure 56: Reset Password, and Figure 57: Forgot Username.

Note: Each individual user should not share their credentials as this violates the organization site agreement.

- G. Ensure ImmTrac2 or any immunization information is not used in a punitive manner (e.g. to deny services or track immigration status) or to solicit new patients or clients.
- H. Acknowledge that loss of user privileges will occur if abuse of ImmTrac2 data is suspected by DSHS.

3. Confidentiality Statement

- A. I agree to provide copies of this confidentiality statement to all organization staff accessing ImmTrac2 for their review, and direct them to ImmTrac2 online training materials located within the Texas Vaccine Education Online - Immunization Branch website: vaccineeducationonline.org/login/index.php and also the ImmTrac2 Instruction Manual located in the help section within the ImmTrac2 web application. Registered organizations are required to have their organization's listed authorized users to review the ImmTrac2 training materials at least every two years.
- B. I agree to be held responsible for my organization's user information recorded within ImmTrac2 and will report high-risk users associated within my organization directly to ImmTrac2 Customer Support.
- C. I agree to update user changes including name, email addresses and phone number changes. I acknowledge users can be associated with more than one organization, and Texas DSHS requires that high risk users be reported by Organization Contacts directly to ImmTrac2 Customer Support so that the offending user account can be locked and/or disabled/disassociated from all organizations associated with that username.

Texas law makes unauthorized use and/or release a criminal act (see Texas Health and Safety Code Sec. 161.009), including negligently using information in the immunization registry to solicit new patients or clients.
- E. I acknowledge that any unauthorized disclosure of Registry information will result in my losing the ability to access ImmTrac2.

- G. I verify that I am an authorized ImmTrac2 Registry user and will only use the ImmTrac2 username assigned by DSHS.
