# **II.** Community Benefits Projects/Activities:

Provide information on name, brief description (3 lines), target population or purpose (3 lines) for each of the community benefits projects/activities CURRENTLY being undertaken by your hospital (example: diabetes awareness). Christus Hopkins Health Alliance serves as a training site for students pursuing degrees in Nursing, Allied Health, and EMS. CHHA Associates serves as formal preceptors for these students on site. Associate preceptors include registered Nurses, Radiologic Technologist and Physicians. The Christus Hopkins Health Alliance sport medicine program has a solid mission that contributes to the overall health of the community in a variety of ways. The program provides health care access to many students that do not have Primary care Provider nor the means to be seen by a provider. What began as a way to help students heal fully before entering the school sports program too early has grown to a service to help students stay healthy. Free Saturday morning sports injury clinics and free preparticipation screenings, are offered to any player regardless of their ability to pay. Now all X-rays, and MRIs are done without charge. Also, the program helps to: -Prevent injuries and guickly evaluate and diagnose injuries -Direct rapid referral to specialist physicians -Rehabilitation and faster return to normal life. It is the student's family decision where they go for clinical care but information about the injuries is shared with all providers on EPIC. If it is determined the student s needs follow-up care, a surgery, or additional visits, the only payment is what the school insurance covers which is a one-time payment pf less that \$2,500 total. So, this program is subsidized heavily by the heath system. This past year in the Mother Frances Reginal health care alone, 2,300 pre-participation physicals were done free of charge to students across the area. 415 were referred to Primary Care or Pediatrician for full physical with emphasis on potential heart issues prior to being able to participate in any sports programs. These same athletics trainers regularly address healthy eating and diabetes issues for these students.
