
Data Analysis Request Form

We will provide simple analyses on our registry data as capacity allows. Release of certain data is based on the discretion of the office; however, we will do our best to accommodate the request. For information on what data are collected in our system, please see our published reports and data dictionaries on the [EMS and Trauma Registries](#) webpages. Please submit this form to injury.epi@dshs.texas.gov as an attachment. We encourage you to create and attach table shells in Word or Excel as examples. Non-zero counts less than five will be suppressed to protect patient confidentiality.

Note: it may take more than two weeks to fulfill a request. Record level data may only be obtained with a request for a public data use file or a DSHS Institutional Review Board (IRB) application.
