### Notes:

- 1 Environmental: A fee equal to 3% of the analysis fee will be charged for a summary of the quality control data routinely generated during the analysis.
- 2 Environmental: A fee of \$8 per sample will be charged for samples submitted but not analyzed at the submitters' request, including samples on hold, and then voided.
- 3 Environmental: A preparation fee applies to all drinking water samples analyzed by inductively coupled plasma (ICP) or by inductively coupled plasma-mass spectrometry (ICP-MS) with turbidity greater than or equal to 1 Nephelometric Turbidity Unit (NTU) or that contains visible particles. The total analysis cost includes the per-element or per-group fee and any required sample preparation fee.
- 4 Environmental: A sample preparation fee applies to all food samples analyzed by ICP or ICP-MS techniques. A sample requiring both ICP and ICP-MS techniques will require two sample preparations. The total analysis fee includes the sample preparation fees and the per-element fee. The fee for analysis of multiple metals by a single method includes a single sample preparation fee and the appropriate per-element fees.
- 5 Environmental: A sample preparation fee applies to all tissue samples analyzed by ICP or ICP-MS. The total analysis cost includes the per-element or per-group fee plus any required sample preparation fee.
- 6 Environmental: A sample preparation fee applies to the analysis of all solid (soil, sediment, etc.) samples. A sample requiring both ICP and ICP-MS techniques will require two sample preparations. The total cost of the analysis will be the sample preparation fees plus the per-element fee. The fee for analysis of multiple metals by a single method includes a single sample preparation fee and the appropriate per-element fees. Determination of leachable metals in solid samples will require a solid leachate sample preparation procedure, as well as analysis of the leachate using non-potable water analytical methods. The total cost of the analysis will be the solid leachate sample preparation fee plus the required non-potable water preparation fee(s) and the per-element tests(s).
- 7 Environmental: A sample preparation fee applies to the analysis of non-potable water samples for americium isotopes, plutonium isotopes, and thorium isotopes. The total cost for the analysis will be the sample preparation fee plus the analytical method fee.
- 8 Environmental: A sample preparation fees apply to the analysis of non-potable water samples. A sample requiring both ICP and ICP-MS techniques will require two sample preparations. The total cost of the analysis will be the required sample preparation fee(s) plus the per-element fee. The fee for analysis of multiple metals by a single method includes a single sample preparation fee and the appropriate per-element fees.
- 9 Environmental: A tissue preparation (homogenization) fee applies to all seafood tissue samples analyzed for metals. The total analysis cost includes the tissue preparation fee, any analyte specific sample preparation fee, and the per-element or per-group test fee.
- 10 Environmental: Analysis of trip and field blank samples will be billed at the same rate as the requested sample analysis.
- 11 Environmental: Except for gamma emitting isotopes and tritium, a sample preparation fee applies to the analysis of all solid (soil, sediment, etc.) samples. The total cost for the analysis will be the sample preparation fee plus the analytical method fee.
- 12 Environmental: Except for gamma emitting isotopes and tritium, a sample preparation fee applies to the analysis of all tissue and vegetation samples. The total cost for the analysis will be the sample preparation fee plus the analytical method fee.
- 13 Environmental: Except for gamma emitting isotopes and tritium, a sample preparation fee applies to the analysis of all wipe, filter, or cartridge samples. The total cost for the analysis will be the sample preparation fee plus the analytical method fee.
- 14 Environmental: If the submitter requires specific samples within their batch to be analyzed and reported as laboratory fortified matrix (FM) or matrix spike (MS), and laboratory fortified matrix duplicate (LFMD) or matrix spike duplicate (MSD), a fee for two additional samples will be charged.

15 Environmental: The preparation fee (or 20% of the analysis fee if there is no separate preparation fee) will be charged for any sample prepared but not analyzed at the client's request.

- Charges for Microbiological Sciences testing will be based upon the actual testing performed as determined by suspect organisms, specimen type, and clinical history provided.
- Emergency Preparedness: Biothreat and Chemical Threat specimens have specific submission requirements. Pre-approval for specimen submission may be required. Please contact the Emergency Preparedness Branch of the DSHS Laboratory in Austin for more information. <https://www.dshs.texas.gov/lab/epr.shtm>
- Miscellaneous: A \$19.23 fee will be incurred for composite/storage for Chemistry
- Miscellaneous: A \$25 fee will be incurred for special specimen processing and storage of clinical specimens
- Miscellaneous: Additional copies of reports and raw data packages will be provided at a cost of \$0.10 per page for each request in excess of 50 pages. An additional fee of \$15 will be charged for each hour in excess of one hour to prepare the request.

16 Environmental: This fee offers a discount over the cost of five Single Metals analysis. Requester selects five of the following metals for analysis: Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Copper, Lead, Manganese, Mercury, Nickel, Selenium, Silver, Thallium, Uranium, Zinc.
