DSHS/THCIC

BACKGROUND

The Texas Health Care Information Council (THCIC) was created by Chapter 108 of the Texas Health and Safety Code (THSC) and was responsible, under Sections 108.011 through 108.0135, for collecting hospital discharge data from all state licensed hospitals except those that are statutorily exempt from the reporting requirement. Exempt hospitals include those located in a county with a population less than 35,000, or those located in a county with a population more than 35,000 and with fewer than 100 licensed hospital beds and not located in an area that is delineated as an urbanized area by the United States Bureau of the Census (Section 108.0025). Exempt hospitals also include hospitals that do not seek insurance payment or government reimbursement (Section 108.009). THCIC became part of the Texas Department of State Health Services (DSHS) effective September 1, 2004, and the DSHS Center for Health Statistics is now responsible for the collection and release of hospital discharge data.

Senate Bill (SB) 7 (82nd Texas Legislature First Called Special Session) SECTION 7.06 repeals the facility exemption sections in Chapter 108 effective September 1, 2014. Rules were adopted implementing the rural provider requirements to begin with January 1, 2015, data. Rural providers and providers that are exempt from state franchise, sales, ad valorem, or other state or local taxes, and that do not seek or receive reimbursement for providing health care services to patients from any source will no longer be exempt from the data reporting requirements of Chapter 108.

PUBLIC USE DATA FILE (PUDF)

Sections 108.011(a) and 108.012 of the THSC require DSHS to provide public use data for computer-to-computer access. It also permits DSHS to charge the data requestor a fee for using the Public Use Data File (PUDF). The PUDF contains patient-level information for inpatient hospital stays. These data are extracted from DSHS's Hospital Discharge Database (HDD).

The PUDF Base Data File is split into two (2) Base Data files. Base Data #1 File contains the required data elements. Base Data #2 File contains most of the situationally required data elements and some calculated fields. The Record ID allows for linking the files together. The providers/submitters have, by law, until the next quarter (following the discharge) to submit their data. This means that the PUDF data is a snapshot in time and each quarter may contain some discharges dated in the previous quarter (i.e. for calendar year data be sure to check the first quarter of the following year also).

The Facility Type Indicator File is also included. This contains 12 variables including the THCIC ID and facility name and variables indicating whether the

facility is a teaching facility or pediatric hospital or other specialty facility. The file also includes POA provider indicator and certification status.

A Facility Reporting Status document is included which provides information about whether the facilities reported or if they reported low numbers and their identification was masked in the data, reported no discharges or if they closed, were out of compliance and if they submitted any comments about their data.

Additionally, the submitter Comments File is included. This contains any comments that were included by the submitter when the respective data was submitted and certified from a given facility.

The 2023 PUDF is available in five fixed length format text files, Base Data #1, Base Data #2, Charges Data, Groupers Data, and Facility Type Data files. The files are also available in tab-delimited format. The size of the files is as follows:

First quarter, 696* hospitals:

Base Data #1	790,235 records	157 variables	Fixed field format	586 MB	Tab-delimited	293 MB
Base Data #2	790,235 records	99 variables	Fixed field format	490 MB	Tab-delimited	204 MB
Charges	15,178,746 records	13 variables	Fixed field format	1,187 MB	Tab-delimited	727 MB
Grouper Data	790,235 records	21 variables	Fixed field format	50 MB	Tab-delimited	65 MB
Facility Type Data	696 records	13 variables	Fixed field format	52 KB	Tab-delimited	41 KB

Second quarter, 700* hospitals:

Base Data #1	792,582 records	157 variables	Fixed field format	588 MB	Tab-delimited	295 MB
Base Data #2	792,582 records	99 variables	Fixed field format	491 MB	Tab-delimited	204 MB
Charges	15,084,398 records	13 variables	Fixed field format	1,180 MB	Tab-delimited	718 MB
Grouper Data	792,582 records	21 variables	Fixed field format	50 MB	Tab-delimited	65 MB
Facility Type Data	700 records	13 variables	Fixed field format	53 KB	Tab-delimited	41 KB

Third quarter, 698* hospitals:

Base Data #1	816,350 records	157 variables	Fixed field format	606 MB	Tab-delimited	303 MB
Base Data #2	816,350 records	99 variables	Fixed field format	506 MB	Tab-delimited	210 MB
Charges	15,425,058 records	13 variables	Fixed field format	1,206 MB	Tab-delimited	733 MB
Grouper Data	816,350 records	21 variables	Fixed field format	51 MB	Tab-delimited	67 MB
Facility Type Data	698 records	13 variables	Fixed field format	52 KB	Tab-delimited	41 KB

Fourth quarter, 707* hospitals:

Base Data #1	821,314 records	157 variables	Fixed field format	609 MB	Tab-delimited	305 MB
Base Data #2	821,314 records	99 variables	Fixed field format	509 MB	Tab-delimited	212 MB
Charges	15,684,199 records	13 variables	Fixed field format	1,227 MB	Tab-delimited	745 MB
Grouper Data	821,313 records	21 variables	Fixed field format	52 MB	Tab-delimited	67 MB
Facility Type Data	707 records	13 variables	Fixed field format	53 KB	Tab-delimited	42 KB

DSHS/THCIC WWW.DSHS.TEXAS.GOV/THCIC DSHS Document # E25-14163 Last Updated: August, 2024 * Final number of reporting hospitals, calculated as the result of the original number of reporting hospitals minus the number of hospital(s) with ALL claims submitted wrong due to wrong type of bill.

The data must be imported into a software package. No software is included with the PUDF. The data file has been tested with several software packages, including Microsoft Access, 2010 Microsoft Excel (one quarter), SAS, and SPSS.

The PUDF, beginning with data collected for 2004, is formatted to accommodate additional data elements available with the collection of data from hospitals using the THCIC 837 format. The following data elements, other than the grouper file, are available in the PUDF beginning with data for 2004 or are not comparable to data collected in years prior to 2004; the grouper file becomes available for 2022 data and beyond:

BASE DATA #1 FILE (Separated Base File 2	2011)
FAC_LONG_TERM_AC_IND	Added 2004. Moved to Facility Type Indicator File in 2011
PAT_COUNTRY	Added 2004

APR DRG	Dynamic; added 2022
RISK MORTALITY	Dynamic; added 2022
ILLNESS_SEVERITY	Dynamic; added 2022
APR MDC	Dynamic; added 2022
APR_GRP_VER	Dynamic; added 2022
APR_GRP_ERROR_CODE	Dynamic; added 2022

DATA PROCESSING AND QUALITY

Beginning with data submitted for 2004 discharges hospitals required to submit discharged inpatient claims data, moved from the submission of data in the uniform bill (electronic UB-92) format to the THCIC 837 format. The data are validated through a process of automated auditing and verification. Each individual hospital is responsible for the accuracy and completeness of its data. Even so, each record is subjected by DSHS to a series of audits that check for consistency and conformity with the definitions stated in the data specification manual. Records failing an audit check are returned to the hospital for correction

and resubmission. Following the correction process, DSHS uses valid claims data to build files of "encounters" where one encounter contains the final discharge and all related interim claims information for a patient. Then, each submitting hospital has an opportunity to review, to make additional corrections, and to certify the encounter data with or without comments. Finally, DSHS builds a final encounter file that includes all corrections submitted by the hospitals. DSHS staff checks and adjusts for missing values and invalid codes in this file before the PUDF is generated. Users are advised to examine every data element to be used for missing values and invalid codes and to read accompanying notes, comments, and other descriptive text.

Beginning with fourth (4th) quarter 2015 data ICD-10-CM diagnostic codes and ICD-10-PCS procedure codes were mandated by the Federal Government. The increased length of the codes required a change in the data file formats. Some data fields (for example, "POA_Provider_ Indicator" and Cert_Status") are moved to the "Facility Type Indicator" file.

PATIENT/PHYSICIAN CONFIDENTIALITY

The legislative intent behind the creation of the Hospital Discharge Database (HDD) was that the data and resulting information be used for the benefit of the public. This is specified in Section 108.013 of the Texas Health and Safety Code (THSC). Section 108.013(c) also stipulates that DSHS may not release, and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates the Section 108.013 and may incur penalties as stated in Sections 108.014 and 108.0141. In addition, under Section 108.013(e) and (f), patient and/or physician information in the HDD cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding. Pursuant to the THSC, DSHS excludes all direct personal and demographic identifiers (e.g., name, address, social security number, patient identifiers, admission and discharge dates) that might lead to the identification of a specific patient from the PUDF.

To protect patient identities, DSHS has suppressed these data elements in this release of the PUDF:

- The last two digits of the patient's ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code.
- The ZIP code is changed to '88888' for patients from states other than Texas and the adjacent states.
- The entire ZIP code and gender code are suppressed if the ICD-10-CM or ICD-10-PCS codes indicates alcohol or drug use or an HIV diagnosis.

- The entire ZIP code and provider name are suppressed if a hospital has fewer than five discharges of a particular gender, including 'unknown'. The provider ID is changed to '999998'.
- The entire ZIP code is suppressed if a hospital has fewer than fifty discharges in a quarter and the provider ID is changed to '999999'.
- The country code is suppressed if the country field has fewer than five discharges for that quarter.
- The county code is suppressed if a county has fewer than five discharges for that quarter.
- Age is represented by 22 age group codes for the general patient population and 5 age group codes for the HIV and alcohol and drug use patient populations.
- Race is changed to 'Other' and ethnicity is suppressed if a hospital has fewer than ten discharges of a race.

Substance Abuse and Mental Health Services Administration (SAMHSA) new rules:

On January 18, 2017, Substance Abuse and Mental Health Services Administration (SAMHSA) passed rules for the protection of patients covered under 42 USC §290dd-2 and 42 CFR Part 2 rules (Mental Health and Substance Abuse patients and HIV patients).

The federal rules require that patients' names, identifiers (ZIP code, city, address, county, and any geographic identifiers below the state level), sex and dates (date of birth, statement from dates, statement through dates and procedure dates) be modified and/or masked in the THCIC Public Use Data Files (PUDF) and Research Data Files (RDF).

Texas Department of State Health Services (DSHS) proposed rules regarding the collection and release of the data regarding those patients covered by the federal rules, which were adopted, published in the January 25, 2019, Texas Register on page 44 TexReg 429 and became effective January 30, 2019.

Beginning with second quarter 2018, the inpatient, outpatient and emergency department public use datasets and any research datasets approved by the DSHS IRB will be appropriately masked for protection.

To protect physician identities, the THSC requires creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available except when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.

It may be possible in rare instances, through complex analysis and with outside information, to ascertain from the PUDF the identity of individual patients. Considerable harm could result if this were done. PUDF users are required to sign and comply with the DSHS Hospital Discharge Data Use Agreement in the Application before shipment of the PUDF. The Data Use Agreement prohibits attempts to identify individual patients.

RESTRICTIONS ON DATA USE

Section 108.010(c) of the THSC prohibits DSHS from releasing provider quality reports until one year of data is available. Users of the PUDF are cautioned about using less than a year of data to make any hospital quality assumptions.

Sections 108.013(c)(1) and (2) and 108.013 (g) of the Texas Health and Safety Code (THSC) prohibit the DSHS from releasing, and a person or entity from gaining access to, any data that could reveal the identity of a patient or the identity of a physician unless specifically authorized by the Act. Any effort to determine the identity of any person or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the THSC and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital for the purpose of verifying information supplied in the DSHS Hospital Discharge Data sets. Any questions about the data must be referred to DSHS only. Data analysis assistance is not provided by DSHS. The data are protected by United States copyright laws and international treaty provisions.

In the Data Use Agreement, the purchaser and end-user of the data are referred to as the "licensee". To acquire the data the licensee must give the following assurances with respect to the use of DSHS Hospital Discharge Data sets:

- The licensee will not release nor permit others to release the individual patient records or any part of them to any person who is not a staff member of the organization that has acquired the data, except with the written approval of DSHS;
- The licensee will not attempt to link nor permit others to attempt to link the hospital stay records of patients in this data set with personally identifiable records from any other source, including any THCIC research data files;
- The licensee will not release nor permit others to release any information that identifies persons, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;

- The licensee will not permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the data covered by the Data Use Agreement to any other person or entity, unless approved in writing by DSHS;
- The licensee agrees to read the User Manual and to be cognizant of the limitations of the data;
- The licensee will use the following citation in any publication of information from this file:
- Texas Hospital Inpatient Discharge Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication];
- The licensee will indemnify, defend, and hold the DSHS, its members, employees, and the Department's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of DSHS.

The licensee understands that these assurances are collected by DSHS to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements with the knowledge that under Sections 108.014 and 108.0141 of the Texas Health and Safety Code to knowingly or negligently release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the PUDF user has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the PUDF are required to purchase a license to use the data.

DATA LIMITATIONS

(Users are advised to become familiar with the data limitations.)

- Section 108.009(h), THSC requires that a uniform submission format be used for reporting purposes. Before 2004 data were collected in the UB-92 format. Data for 2004 were collected in both UB-92 electronic format and THCIC 837 format. Because these are billing forms, the data collected are administrative data and not clinical data. Beginning with 2005 all data are collected from the THCIC 837 format.
- Records with Major Diagnositic Category (MDC) codes of 15 (newborns and other neonates with conditions originating in the perinatal period), 20 (alcohol/drug induced organic mental disorders), or 22 (burns) and Patient Status codes of 62 (discharged/transferred to inpatient rehabilitation), 71

(discharged/transferred to other outpatient service), or 72 (discharged/transferred to institution outpatient service) contain an APR-DRG of 956 (ungroupable). These Patient Status codes were not valid when version 15 of the 3M APR-DRG Grouper was developed. A valid Patient Status code is required for these MDC codes for APR-DRG assignment and Risk of Mortality and Severity of Illness scoring. Patient status codes 71 and 72 are no longer valid as of October 2003. After October 2003 records with MDC codes of 15, 20, or 22 and Patient Status code of 62 contain an APR-DRG of 956.

- Hospital charges data are available after third (3rd) quarter 2000. Earlier data were not reported correctly by some hospitals.
- Secondary source of payment data are available after third (3rd) quarter 2000. Earlier data were not reported correctly by some hospitals.
- Gender is suppressed for patients with an ICD-10-CM code that indicates drug or alcohol use or an HIV diagnosis.
- The last two digits of the ZIP code are suppressed if there are fewer than thirty patients included in the zip code. All of the ZIP code is suppressed for patients with an ICD-10-CM code that indicates drug or alcohol use or an HIV diagnosis or if a hospital has fewer than five discharges of a particular gender, including 'unknown'. ZIP code is changed to '88888' for patients from a state other than Texas and not from an adjacent state. If ZIP is '88888' the state abbreviation is changed to 'ZZ'. ZIP code is suppressed if a hospital has fewer than five patients of a particular gender, including 'unknown'.
- Admission Source as reported by hospitals is suppressed, as recommended by the Council, when the Admission Type is 'newborn'. Data users can use ICD-10-CM codes to correctly identify the clinical status of newborns.
- Uniform identification numbers for physicians are available after first (1st) quarter 2000 except when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.
- The data are a snapshot in time. Hospitals must submit data no later than 60 days after the close of a calendar quarter. Depending on hospitals' collection and billing cycles, not all discharges may have been billed or reported. This can affect the accuracy of source of payment data, particularly self-pay and charity that may later qualify for Medicaid or other payment sources.
- Beginning with data for 2004 discharges, up to 25 diagnosis codes, up to 25 procedure codes, and up to 10 E-codes can be submitted. For earlier years the number of diagnosis codes collected per patient is limited to 9 and the number of procedure codes to 6. Because of these limitations, sicker patients and the hospitals that treat them may not be accurately represented in the data. This may also result in total volume and percentage calculations for diagnoses and procedures not being complete.

DSHS Document # E25-14163

Page 10 -

- Race and ethnicity data are required by law and rule to submit for each patient, generally not collected by hospitals and may be subjectively captured.
- Inaccuracies in the data and incompleteness of the data are addressed in the hospitals' comments if submitted by the facilities.
- County of residence is not collected by hospitals. County Federal Information Processing Standard (FIPS) codes are assigned by DSHS based on patient ZIP code.
- DSHS assigns the Risk of Mortality and Severity of Illness scores using methodology designed by 3M. These scores may be affected by the number of diagnoses and procedure codes collected by DSHS or by the facility's information system and may be understated.
- Comparability of length of stay (LOS) across hospitals is affected by factors such as case-mix and severity complexity, payer-mix, market areas and hospital ownership, affiliation or teaching status. Any analysis of LOS at the hospital level should consider the above factors.
- Length of stay is limited to 999 days prior to 2004 discharges.
- Any analysis of mortality should note that the data reflect only patients who died in the hospital and not those who died after discharge from the hospital.
- Conditions present at time of admission cannot be distinguished from those occurring during hospitalization prior to 2011 discharges. Diagnosis present on admission indicator codes (POA) were required for all hospitals, except Critical Access Hospitals, Inpatient Rehabilitation Hospitals, Inpatient Psychiatric Hospitals, Cancer Hospitals, Children's or Pediatric Hospitals, and Long-Term Care Hospitals. Some acute care hospitals that have special units similar to the hospitals exempted from reporting POA may not include POA codes for those patients.
- Updates to any PUDF CD's are available through the THCIC website, http://www.dshs.texas.gov/thcic/, which should be checked periodically as notifications of an update will not be sent.
- DSHS collects data from all hospitals in the state not specifically exempted by statute prior to January 1, 2015, services. Some hospitals maybe exempted for certain situations (for example, natural or other disasters or other unusual conditions) for limited time periods. This hospital mix should be considered when drawing conclusions about the data or making comparisons with other data.
- Any conclusions drawn from the data are subject to errors caused by the inability of the hospital to communicate complete data due to form constraints, subjectivity in the assignment of codes, system mapping, and clerical error. The data are submitted by hospitals as their best effort to meet statutory requirements.

HOSPITAL COMMENTS

(Users are advised to consider hospital comments in any analysis of the data.)

Included with the PUDF is a separate file containing the unedited comments submitted by hospitals at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals and are not necessarily the views of the DSHS. Hospitals that submitted comments are identified in separate file called the 'Reporting Status of Texas Hospitals'.

CITATION

Any statistical reporting or analysis based on the data shall cite the source as the following:

Texas Hospital Inpatient Discharge Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication].

Texas Hospital Inpatient Discharge Public Use Data File

DATA DICTIONARY

The purpose of this document is to provide the user with the necessary information to use and understand the data in the Public Use Data File. The following information is provided:

Field Unique, abbreviated name of the data element. Description Brief explanation of the data element. Descriptions of data elements are taken from specifications manuals **Data** Provided by the health care facility on the claim form (Claim) **Source** Assigned by DSHS (Assigned) Provided to THCIC by the healthcare facility (Provider) Calculated by DSHS (Calculated) Note: For those data elements that have been temporarily suppressed, the quarter of data for which the data element will be released is noted following the Data Source. Alphanumeric or numeric **Type** Valid codes for a data field. Values taken from specifications manuals. Coding scheme

Note a change: Any code provided by a hospital that has been determined to be invalid has been assigned the value `. Any data element that is blank should be interpreted as 'missing', no data provided, unless otherwise noted.

BASE DATA #1 FILE

Field 1:	RECORD_ID					
Description:	Record Identification Number. Unique number assigned to identify the record. First available					
	1 st quarter 2002. Does NOT match the RECORD ID in THCIC Research Data Files (RDF's).					
Beginning Position:	1 Data Source:	Assigned				
Length:	12 Type:	Alphanumeric				
Field 2:	DISCHARGE					
Description:	Discharge Quarter. Year and quarter of disch	Discharge Quarter. Year and quarter of discharge. yyyyQn.

Code identifying whether E_Code_9 code was present at the time the patient was admitted to **Description:**

the hospital

Coding Scheme: Same as Field POA_PRINC_DIAG_CODE

Beginning Position: 415 **Data Source:** Claim

Length: Type: Alphanumeric

Field 101: E CODE 10

Description: ICD-10-CM diagnosis code, including the 4th, 5th, 6th and 7th digits if applicable, of an

additional external cause of morbidity. Decimal is implied following the third character.

Data Source: Beginning Position: 416 Claim

Alphanumeric Length: 7 Type:

POA_E_CODE_10 **Field 102:**

Description: Code identifying whether E Code 10 code was present at the time the patient was admitted to

the hospital

Same as Field POA_PRINC_DIAG_CODE **Coding Scheme:**

Beginning Position: 423 **Data Source:** Claim

Length: Type: Alphanumeric

PRINC SURG PROC CODE **Field 103:**

Description: Code for the principal surgical or other procedure performed during the period covered by the

bill. ICD-10-PCS code.

Beginning Position: 424 **Data Source:** Claim

Length: Type: Alphanumeric

Field 104: PRINC SURG PROC DAY

Description: Day of principal surgical or other procedure equals Principal Surgical Procedure Date minus

Admission/Start of Care Date.

Beginning Position: 431 **Data Source:** Calculated Length: 4 Type: Alphanumeric

OTH SURG PROC CODE 1 **Field 105:**

Description: Code for surgical or other procedure other than the principal procedure performed during the

period covered by the bill. ICD-10-PCS code.

Beginning Position: 435 **Data Source:** Claim

Length: Type: Alphanumeric

Field 106: OTH SURG PROC DAY 1

Description: Day of other surgical or other procedure equals Other Surgical Procedure Date minus

Admission/Start of Care Date

442 **Beginning Position: Data Source:** Calculated Length: Type: Alphanumeric

Field 107: OTH_SURG_PROC_CODE_2

Description: Code for surgical or other procedure other than the principal procedure performed during the

Claim

period covered by the bill. ICD-10-PCS code.

Beginning Position: 446 **Data Source:**

Length: Type: Alphanumeric

Field 108: OTH SURG PROC DAY 2

Day of other surgical or other procedure equals Other Surgical Procedure Date minus **Description:**

Admission/Start of Care Date

Beginning Position: 453 **Data Source:** Calculated Length: 4 Type: Alphanumeric

Field 109: OTH SURG PROC CODE 3

Code for surgical or other procedure other than the principal procedure performed during the **Description:**

period covered by the bill. ICD-10-PCS code.

Beginning Position: Data Source: 457 Claim

DSHS Document # E25-14163 DSHS/THCIC Page 31 WWW.DSHS.TEXAS.GOV/THCIC Last Updated: August, 2024

Description: Attending Physician Uniform Identifier. Unique identifier assigned to the licensed physician

expected to certify medical necessity of services rendered, with primary responsibility for the patient's medical care and treatment. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and

podiatrists authorized by the hospital to admit or treat patients.

Suppression: Suppressed when the number of physicians represented in a DRG for a hospital is less than the

minimum cell size of five.

Coding Scheme: 9999999998 Cell size less than 5

9999999999 Temporary license or license number could not be matched

Beginning Position:699Data Source:AssignedLength:10Type:Alphanumeric

Field 154: OPERATING_PHYSICIAN_UNIF_ID

Description: Operating or other Physician Uniform Identifier (if applicable). Unique identifier assigned to

the operating physician or physician other than the attending physician. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and podiatrists authorized by the hospital to admit or treat

patients.

Suppression: Suppressed when the number of physicians represented in a DRG for a hospital is less than the
