Texas Cancer Registry Data Use

Publications & Research

January 2020
A SPECIAL THANKS TO THE CANCER REGISTRARS AND OTHERS RESPONSIBLE FOR DATA COLLECTION ACROSS TEXAS FOR THEIR HARD WORK AND DEDICATION.

Recognition of Funding Sources

Maintaining a statewide cancer registry that meets both National Program of Cancer Registries and Centers for Disease Control and Prevention (CDC) high quality data standards and North American Association of Central Cancer Registries (NAACCR) gold certification is accomplished through collaborative funding efforts.

In 2005, the Texas Legislature provided additional funding for the Texas Cancer Registry (TCR) to achieve and maintain national high-quality data standards and certification. With this new funding, the TCR attained both CDC high quality data standards and gold certification from NAACCR for the first time in 2005. These standards have been maintained through funding from the Texas Department of State Health Services, the Higher Education Coordinating Board, and the Cancer Prevention and Research Institute of Texas.

The TCR also acknowledges the CDC for its financial support under Cooperative Agreement #1NU58DP006308. The contents of this report are solely the responsibility of the authors and do not necessarily represent the official views of the CDC.
