August 25, 2014

Approved 1% Low Fat Milk Quarts

Effective October 1, 2014, WIC women and children 2 years and older will only be allowed to purchase 1%, ½%, skim, and fat free milk due to the new food package rules issued by USDA/FNS. The 2% milk will no longer be allowed.

Since 73% of your WIC milk sales currently are 2% milk, this is a major change. We estimate the majority of WIC clients who previously purchased 2% milk will switch to 1% milk. To meet the demand for the 1% quart milk, the Texas WIC Program has been working diligently with manufacturers and suppliers to obtain the milk brands and UPCs that will be available to our vendors. The chart below lists the quarts that have already been approved and entered in the Authorized Product List (APL).
